# Loewe **aura.pure**

High-performance technology for pure coffee perfection.

## **Powerful thermal technology. Without long warm-up time.**

Ready to use. The espresso machine is ready for action in just 2 minutes thanks to the three-thermal block system. Efficient heating of the machine, brewing head and steam system ensure constant performance and temperature control. 15 bar water pressure and a professional pressure gauge for optimum brewing control. Separate thermal blocks for steam system and coffee extraction enable simultaneous preparation for individual latte art. The powerful thermal technology is not only functional, but also energy-efficient.

## **Luxurious design. With real wood finishes.**

The Loewe aura.pure combines professional features with luxurious design. Made from the highest quality matt steel in basalt grey, with integrated real wood finishes made from pure red oak. An extensive set of elegant and practical accessories completes the design of the espresso machine with portafilter, milk jug, tamper, tamper mat, brush and cleaning cloth perfectly matching the design of the espresso machine. A removable 2.5 litre water tank with water filter and removable drip tray ensure easy handling and complete the design of the machine.

## **Pure barista feeling. Professional all-in-one-solution.**

The Loewe aura.pure offers luxurious design with real wood finishes and pure convenience thanks to the integrated conical burr grinder. Three thermal blocks ensure fast heating and precise temperature control. Personalise your espresso with the individual pre-infusion function for full flavour potential. All important parameters for espresso preparation can be set at the touch of a button on the display, such as the duration of the grinding process, pre-infusion and espresso extraction.

## **Integrated precision grinder. With 66 grind settings.**

Finest quality for your preferences. The integrated stainless steel conical burr grinder guarantees precise grinding for optimum extraction and pure flavour. Choose from 66 grinding levels, customised to your brewing method from fine grind for espresso to coarse grind for filter coffee or french press. The anti-static technology with ionising function reduces static electricity and ensures even dispensing directly into the portafilter.

## **Elegant accessories. For a complete barista setup.**

Elegant and practical accessories. The Loewe aura.pure offers a wide range of accessories that turn coffee preparation into an art. The two portafilters single and double shots, along with double wand sieves inserts and real wood handle, accommodate one or two cups. A high-quality tamper with real wood handle matches the design perfectly. The 350ml milk jug in basalt grey enables unique latte art. A cleaning cloth, tamper mat, brushes and a blind sieve complete the equipment for a complete barista setup.

## **Equipped with pre-infusion. For improved coffee flavour.**

An enhanced brewing is achieved by the programmable pre-infusion settings. This feature soaks the coffee grounds before extraction, ensuring even saturation and de-gassing of fresh beans. With 10 adjustable settings, the soak time for a balanced flavour can be fine-tuned, especially for lighter beans, ensuring a balanced and superior coffee experience.
